

AMENDMENTS TO THE CLAIMS

This Listing of Claims will replace all prior versions, and listings, of Claims in the Application:

Listing of Claims:

Claim 1 (Currently amended): A card for multi-purpose using, comprising:

a card, comprising at least one reading zone, with a thickness ~~making it~~
~~able~~ allowing said card to pass in and out of a standard magnetic card reader; and

a casing plate, comprising two convex platforms on each side for
positioning said card, a positioning member being formed on said casing plate, said
positioning member having one of a smooth top surface and a plurality of tooth-shaped
units;

wherein said casing plate with said positioned card is ~~able~~ adapted to be
inserted into an optical driver, said card being provided with a reading area, an aperture
being formed through the center of said reading area, said aperture being adapted to
receive said positioning member.

MR3003-9

Appl. No. 10/015,571

Amendment dated 5 November 2003

Reply to Office Action of 7 August 2003

Claim 2 (Original): The card as recited in claim 1, wherein said reading zone is one of a magnetic stripe, an IC chip, a reading area of an optical disc and combination thereof.

Claim 3 (Currently Amended): The card as recited in claim 1, wherein the thickness of said casing plate associated with said positioned card is ~~equally a disc thickness following by Compact Disc Digital Audio Standard described as the Red Book and Compact Disc Recordable (CD-R) Standard described as the Orange book~~ 1.2 mm.

Claim 4 (Canceled).

Claim 5 (Canceled).

Claim 6 (Original): The card as recited in claim 1, wherein said casing plate is made of a transparent flexible material.

Claim 7 (Original): The card as recited in claim 1, wherein the thickness of said card is in accordance with the specification of the ISO 7816.

Claim 8 (Original): The card as recited in claim 1, wherein the thickness of said card is 0.8mm and the thickness of said casing plate is 0.4mm.

Claim 9 (Currently Amended): A card for multi-purpose using, comprising:
a card, comprising at least one reading zone; and
a casing plate, comprising a transparent loading zone for positioning said card, a positioning member being formed on said casing plate, said positioning member having one of a smooth top surface and a plurality of tooth-shaped units;

wherein the thickness of said casing plate associated with said positioned card is ~~equally a disc thickness following by Compact Disc Digital Audio Standard described as the Red Book and Compact Disc Recordable (CD-R) Standard described as~~
